inhibitors. In addition to their traditional pharmacological roles, the cysteine proteases cathepsins are important mediators of inflammation, contributing to immunoglobulin production, granulocyte migration, and vascular permeability. The generation of cathepsin-specific inhibitors represents a novel approach for treating these inflammatory conditions. In this review, the molecular characteristics of the cathepsins,

and the structure-activity relationships of their specific inhibitors, are outlined. The potential utility of this novel class of anti-inflammatory drugs in treating the inflammatory conditions listed above is discussed.

## How to Create a Job-Hunt Plan and Start Interviewing

Do you need a job? The answer is “yes,” of course, but don’t let that stop you from considering the best and most logical first steps toward finding that job. Every

---

job search is different. To do your own job search, you'll need to find out: Where you stand (just how good is your employment status?). What job you want (for instance, a new employer might be seeking experience, whereas a current employer might be looking for a specific skill set, such as web development). What you are looking for (what do you want the job a1d647c40b
