**What's New In?**

Error 1704 Cleanup Utility is a lightweight and portable application that removes the "error 1704" issue that occurs when MSI packages do not always uninstall a program properly. It is very simple to use, as it automatically removes the error from computers. Since installation is not a prerequisite, you can drop the executable file anywhere on the hard disk and click it to run. It is also possible to save Error 1704 Cleanup Utility to a USB flash disk or similar storage unit, in order to run it on any machine with minimum effort. An important aspect to take into account is that the Windows Registry does not get new entries, and files are not left behind on the HDD after removing the tool. The interface is based on a small, regular window with a plain and simple layout, where all you have to do is click a button to initialize the error scanning and removing procedure. The app is very light on the system resources and quickly finishes a task, without causing the operating system to hang, crash or pop up error dialogs. We haven't come across any issues in our tests. All in all, Error 1704 Cleanup Utility serves its purpose. Tags: Error 1704 Cleanup Utility FPS Boost AFAIK, FPS Boost has nothing to do with speeding up a game or improving fps, it basically works by using a "fluid" geometry to give an illusion of better visuals, and if you are a person who likes to watch a video game on a large screen, you can set it up so the games are running on a second monitor. Just know that the software is very limited, and you don't get a lot of options, but you can try it on your own risk.
